

CANTATA HEALTH

NetSolutions, working for you:

We know this has been a difficult time in long-term care and we are doing our best to aid you through this pandemic with product updates, streamlined emails with information on COVID-19, team members that are readily accessible, and more.

The email below lays out some offerings that would be helpful during this time. When you are ready, please [contact us](#) if you are interested in learning more about leveraging any of these.

NetSolutions Dashboard Enhancements

Our Special focus Dashboard, offers real-time COVID-19 monitoring, isolation monitoring, and change of condition monitoring. Get ahead of and closely monitor breakouts.

Cloud Hosting

Our cloud-based environment helps to create harmony between providers, patients, and payers to simplify coordinated care and accelerate payments. With hosting, you can reduce lag, secure your data from ransomware and other hacks, and save money through the economy of scale provided by our data centers and highly-trained staff.

InfectionWATCH by ABILITY Networks

Stringent infection control protocols are crucial. Not only do your infection control measures keep staff and residents safe from outbreaks like COVID-19, they also ensure that your facility is compliance with CMS requirements.

Exchange

Through interoperability, collaborating and sharing essential medical data with outside providers is possible and it brings your organization that much closer to a seamless patient experience.

Exchange by Cantata Health offers: direct and secure messaging, patient portals, provider portals, electronic health record integration, and can help you maximize your technology investment. With Exchange's advanced interoperability platform you can easily connect to State/HIE Reporting and push data to state reportable Labs, Biosurveillance, and more.

Referral Portal by Cantata Health

Screening incoming residents is now more important than ever. Our Referral Portal enables you to add and track referrals for your facility with the ability to import real-time, relevant data from Acute EHRs including documents, conditions, and more. Our COVID risk assessment will help you make sure you're accepting the best referrals for your facility.
