

AI for Arize

Less friction. More focus on care.

Cantata delivers the power of artificial intelligence by leveraging Arize's API-based open architecture to anchor trusted partner AI platforms while enhancing high-value workflows with its own embedded AI assistance. Our objective is to ensure Arize is the most trusted, compliant, and extensible behavioral health system of record while enabling best-of-breed AI innovation to plug in safely and deliver measurable ROI.

As AI technologies rapidly evolve, Cantata's customers can take advantage of relevant technologies as they become available. This approach reduces our customers' risk for regulatory, reputational, and execution issues—allowing them to use AI tools as they are validated, monitored, and deployed within a controlled governance framework.

Ask Arize: Your AI-Powered Assistant

Less training. Less friction. More focus on care.

Ask Arize is like having a built-in expert guiding every user through the system—answering real-time workflow questions, reducing onboarding time, and keeping attention where it belongs: on the patient.

Built inside the EHR. Not bolted on.

Ask Arize is embedded directly in the platform, so clinicians, administrators, and billing staff get AI-powered insights without switching tabs, exporting data, or using a separate tool.

Adheres to role-based access controls.

Ask Arize ensures all insights and data visibility align with user permissions to safeguard client confidentiality.

Leverages both structured and narrative data.

Ask Arize connects services, programs, assessments, and claims for more accurate, actionable insights.

Provides revenue cycle visibility via meaningful real-time revenue analytics.

Use Ask Arize to analyze 837 claims and 835 remittances to identify trends, issues, and opportunities.

Individualized Client Insights

Ask Arize analyzes each client on a clinician's caseload to surface personalized treatment insights, giving providers a deeper, more complete picture of their clients without ever leaving the EHR.

Billing & Revenue Analytics

Ask Arize brings clarity to the financial side of care, delivering analytical insights across 837 claim files and 835 remittance data to help practices identify trends, resolve issues, and optimize revenue performance with confidence.

Intelligent In-App Guidance

Whether onboarding or managing a complex workflow, users can turn to Ask Arize for real-time, contextual help directly within the platform—reducing friction, saving time, and keeping focus on the patient.
